

Reveal(x) 360

FOR AZURE

Cloud-Native Security for Hybrid Enterprises

Complete Visibility, Real-Time Detection, and Intelligent Response

The modern enterprise is a complex web of workloads consisting of hardware, applications, and data spread across edge, core, and cloud deployments. Add in a growing remote workforce, and the security challenges only increase. Tools that rely on logs or agents can't provide Security Operations Centers (SOCs) with the visibility they need to mitigate risk that can derail cloud migration and business transformation initiatives.

Reveal(x) 360 for Azure provides network detection and response (NDR) capabilities that allow security teams to confidently secure their Azure environment from the inside out. ExtraHop brings complete visibility, real-time detection, and intelligent response to Azure workloads, enabling SOCs to find and stop advanced threats like supply chain attacks.
