

Reveal(x)

FOR AZURE

Cloud-Native Security for Hybrid Enterprises

Complete Visibility, Real-Time Detection, and Intelligent Response

The modern enterprise is a complex web of workloads consisting of hardware, applications, and data spread across edge, core, and cloud deployments. Add in a growing remote workforce, and the security challenges only increase. Tools that rely on logs or agents can't provide Security Operations Centers (SOCs) with the visibility they need to mitigate risk that can derail cloud migration and business transformation initiatives.

Reveal(x) for Azure provides network detection and response (NDR) capabilities that allow security teams to confidently secure their Azure environment from the inside out. ExtraHop brings complete visibility, real-time detection, and intelligent response to Azure workloads, enabling SOCs to track rogue instances and eliminate risks created by misconfigurations, insecure APIs, and unauthorized access.

Reveal(x) Security Solutions for Azure

The Reveal(x) platform is available in two deployment models for cloud-native NDR in Azure environments—SaaS-based Reveal(x) 360 or self-managed Reveal(x) VM for Azure. Reveal(x) 360 provides unified security across on-premises and cloud environments, 360-degree visibility and situational intelligence without friction, and immediate value with a low management burden. Reveal(x) VM for Azure sensors offer machine learning-powered analysis as well as threat detection but do not leverage ExtraHop's cloud-hosted record store or control plane.

	Reveal(x) 360	Reveal(x) VM FOR AZURE
SaaS-based deployment	✓	
Self-managed sensor		✓
Cloud-scale ML	✓	✓
ExtraHop-managed record warehouse	✓	
Control plane for unified visibility (hybrid and multicloud)	✓	
Announced vTAP integration	✓	✓
