

ExtraHop Dashboards

A powerful yet easy way to explore the IT and business value of wire data

ExtraHop® dashboards are the launching point for IT and business users to explore the wealth of information provided by wire data analytics and are designed for ease of use, search, and rapid custom visualization.

Explore Your Wire Data

Wire data is a rich and voluminous source of intelligence, making the ability to easily explore and extract relevant insights critical. ExtraHop dashboards empower users to explore their data. Various elements facilitate this exploration, including built-in dashboards that summarize all the activity within a user's environment, and search and graph capabilities for rapid on-the-fly analysis. Designed for ease of use and flexibility, ExtraHop dashboards feature a range of powerful analysis and visualization options.

Built-in Dashboards – Auto-generated dashboards that summarize activity and display the top KPIs for a given environment, including role-based views of web, database, storage, network, and other activity.

My Dashboards – Custom dashboards that users can easily create, populate, and duplicate. These views can be shared or hidden as desired.

Time-Based Comparison – Easy and flexible comparison of metrics over different time intervals for rapid and real-time trending and baselining.

Metric Catalog – Searchable and dynamic catalog of 2,500+ built-in metrics in addition to user-defined custom metrics.

Metric Explorer – Tool for quickly exploring and graphing multiple metrics by source (device, group, or application) in a new widget, with a range of trending and visualization options.

Show Descriptions – Descriptive hovertext that helps users better understand individual metrics and what they mean.

Export – Push-button function to export individual charts to PDF, Excel, or CSV.

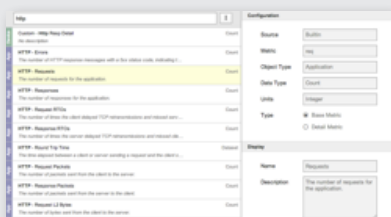

ExtraHop dashboards are the launching point for users to explore their data, and offer powerful analytics and visualization capabilities.

BENEFITS

- Intuitive user experience
- Powerful analytics and visualization capabilities
- Wide range of customization options
- Dashboards are shareable with colleagues.
- Baselining trends made easy

Explore metrics and create compelling visualizations with the Metric Explorer

Search 2,500+ metrics with the Metric Catalog

Try It Online!
