

The ExtraHop Healthcare Edition

An easy and cost-effective way to get the most out of wire data analytics in healthcare environments

Top 5 benefits of the Healthcare Edition:

1. Dramatically reduce MTTR with correlated, cross-tier visibility tailored for healthcare environments
2. Ensure HL7 interface health and performance with the first-and-only real-time HL7 analytics solution
3. Keep vendors accountable for application performance with details off the wire
4. Address a wide range of use cases, from database performance to VDI monitoring to analysis of clinical workflows
5. Straightforward licensing and favorable pricing

The ExtraHop Healthcare Edition combines visibility into key technologies that matter to healthcare, supported healthcare-specific customizations, and remote analysis reports in a single package with straightforward licensing.

Healthcare Edition Details

The Healthcare Edition delivers tremendous value in a single package that adds to the robust functionality of the ExtraHop platform. The Edition consists of the following components:

- **Protocol Analysis Modules:** Real-time transaction analysis for one database protocol and one storage protocol, as well as the HL7 messaging standard and Citrix ICA (ICA available only in Premium Edition).
- **Supported Bundles:** Bundles are customizations of the ExtraHop platform to meet the needs of healthcare organizations. They include customized dashboards, alerts, geomaps, dynamic groups, and Application Inspection Triggers (AI Triggers). For instance, the HL7 Operations Bundle provides visibility and alerting into the different active interfaces in an environment.
- **Atlas Services Remote Analysis Reports:** Two Atlas reports that offer expert analyses of your environment using ExtraHop data, including acute issues and opportunities for optimization.

The following table summarizes what's included in the Edition:

	Standard Edition	Premium Edition
Analysis Modules		
Database*	✓	✓
Storage	✓	✓
HL7	✓	✓
Citrix		✓
Supported Bundles	✓	✓
Atlas Reports	Two reports	Two reports

* Includes paid database protocol analysis modules such as MS SQL and Oracle

The Healthcare Edition includes two remote analysis reports to assess the health of your environment and pinpoint acute issues.

About ExtraHop Networks

ExtraHop is the global leader in real-time wire data analytics. The ExtraHop Operational Intelligence platform analyzes all L2-L7 communications, including full bidirectional transactional payloads. This innovative approach provides the correlated, cross-tier visibility essential for application performance, availability, and security in today's complex and dynamic IT environments.
