

# Database and NoSQL Monitoring at Scale

“We have to be able to serve a transaction tomorrow with fewer resources than today. If we don’t do that, we’ll get beaten by the competition because they’ll figure out how to do it first.”

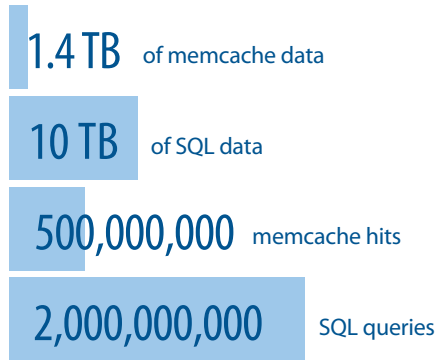

—Drew Garner, Director of Architecture Services, Concur

## DATABASES MONITORED

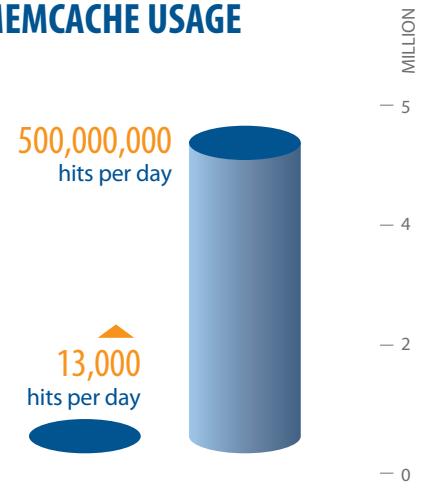

NO PROFILERS, 0% OVERHEAD

## SERVED PER DAY

## INCREASED MEMCACHE USAGE

Concur’s database is the **BRAIN OF ITS APPLICATION.**

Concur processes more than \$50 billion in travel and expense reports each year, roughly 10% of the worldwide total.

Concur is the largest SaaS ERP vendor in terms of total software revenue.
