

Implementing Government Cybersecurity Guidance

Act Quickly to Assure Readiness
Against Nation-State Cyber Threats

The threat of nation-state actors against critical assets has never been higher. Defend your cyber territory and focus on your core mission cyber resilience implementation from ExtraHop.

INCREASED CYBER RISK

Governments across the globe have issued cybersecurity guidance to mitigate increased risk from nation-state threats to private and public organizations.

EXTRAHOP ACCELERATES CYBER READINESS

ExtraHop Reveal(x) network detection and response delivers several vital technical controls to achieve high level goals common to guidance issued by all the nations.

1. Reduce the likelihood of a damaging cyber intrusion.
2. Take steps to quickly detect intrusions potential intrusions.
3. Ensure your organization is prepared to respond if intrusions occur.
4. Maximize your organization's resilience to a destructive cyber incident.

HOW IT WORKS

ExtraHop Reveal(x) network detection and response technology supports fast and thorough implementation of government cybersecurity guidance.

Secure Your Whole Attack Surface

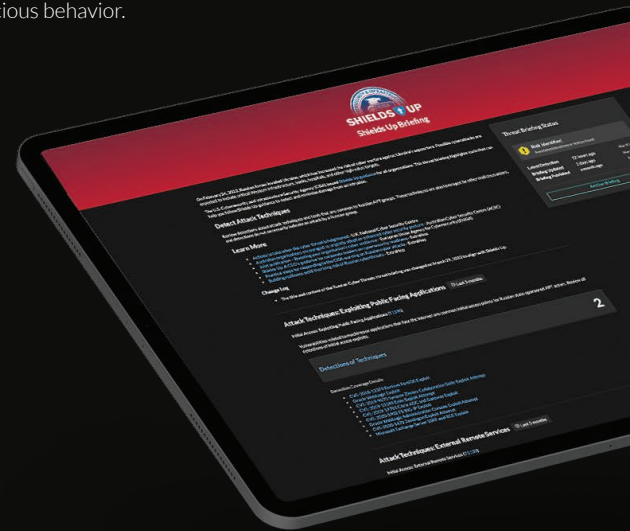

- Monitor network traffic to, from, and inside your network for suspicious behavior.
- Identify and secure all assets including unmanaged devices.
- Analyze all communications with cloud and SaaS systems.

Assure Complete Security Hygiene

- Identify and eliminate insecure ports and protocols.
- Catch weak encryption schemes.
- Confirm and compensate for other hygiene controls.

Detect Advanced Threats Quickly

- Detect stealthy attack behaviors other tools miss.
- Decrypt traffic to catch attackers attempting evasion.

CYBER READINESS ASSURANCE

ExtraHop Advisor Services and ExtraHop Network Assurance Incident Response services are here to help your business implement government cybersecurity guidance and take back the cyber advantage.
