Reveal(x) 360
Cloud Threat Defense for AWS

aws
PARTNER
Security Software Competency
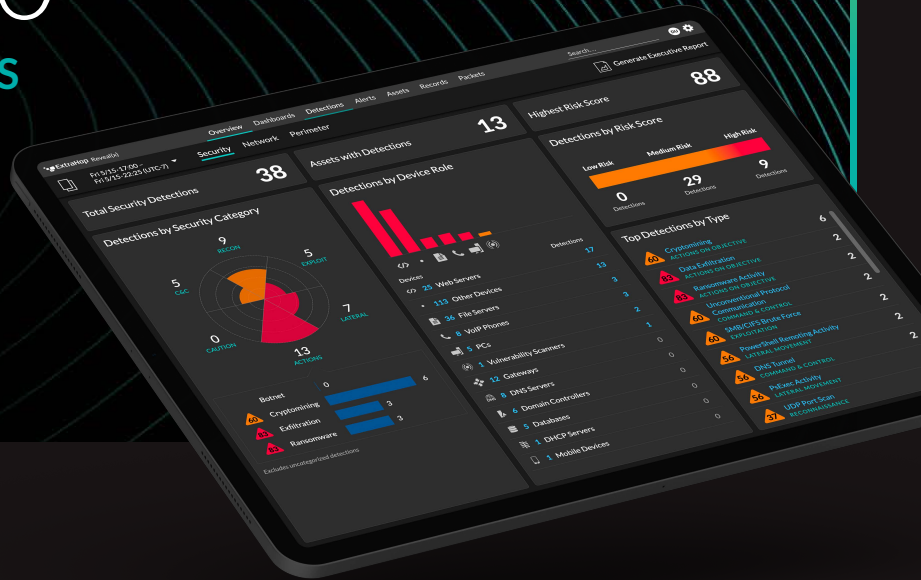

Defend Your Cloud Without Friction

Cloud environments are notorious for visibility gaps that weaken security. Unmanaged workloads, serverless environments, and containers that only exist for minutes all contribute to visibility challenges. To truly defend AWS environments from advanced threats, organizations need to take a layered approach to security. With Reveal(x) 360, cloud security teams can do just that.

Reveal(x) 360 now offers continuous visibility in AWS based on VPC Flow Logs. Organizations can choose flow logs as a standalone subscription or combine that cloud-native data source with packets to take a multi-layered approach to cloud threat defense.

The ability to access multiple data sources in the same management pane is a game-changer for security teams in a few key ways:

- Extends visibility by combining the breadth of flow logs with the depth of packets
- Expands coverage with AI-powered analysis and real-time data visualization
- Enhances device discovery, threat hunting, and investigation capabilities
- Eliminates friction for security teams by deploying without agents

With Reveal(x) 360, security teams can improve their situational awareness, gain actionable intelligence, and quickly zero in on malicious activity like lateral movement, command and control communication, and data exfiltration.

Use Cases

Advanced Threat Detection

Inventory & Configuration

Dependency Mapping

Workload & Data Monitoring

Forensic Investigation

Compliance & Audit

Container Security

Vulnerability Assessment

Threat Hunting

ABOUT EXTRAHOP NETWORKS

ExtraHop is on a mission to stop advanced threats with security that can't be undermined, outsmarted, or compromised. Our dynamic cyber defense platform uses cloud-scale AI to help enterprises detect and respond to advanced threats—before they compromise your business. When you don't have to choose between protecting your business and moving it forward, that's security uncompromised.
