

ExtraHop Networks: Front-End Software Development Engineer

Do you want to solve problems instead of sit through meetings? Do you work better as part of a small, focused team? Do you want to feel a sense of ownership in what you do and make a real impact? So do we. We are looking for individuals who love technology, appreciate elegant solutions to hard problems, and want to learn new things. Sense of humor required... Seriously.

ExtraHop Networks is more than just the products we engineer and sell. We've built our company from the ground up with the idea of creating great jobs for great people. As a fast-paced startup, each day offers new opportunities to innovate in all areas of the company. We value quality and integrity in everything we do, from interacting with customers to developing the best technology in the industry. We are known as innovators and have received many awards for our team and our products, including Best of Interop, *Seattle Business Magazine's* Innovation of the Year, and 100 Best Companies to Work for in Washington, among others.

If you are a Front-End Software Development Engineer who shares our philosophy, we would like to hear from you! Our ideal candidate is an experienced front-end software engineer who can go from creating wireframes to prototypes to well-engineered, fully functional user interfaces using current web technologies and modern development practices.

Duties and Responsibilities

- Design and implement the product front-end and reporting functionality using innovative web technologies
- Work as a cross-departmental liaison to gather data for product visualization
- Analyze software requirements to determine feasibility of design within time and cost constraints
- Document software designs in functional specifications and other design documents

Required Qualifications and Experience

- Four-year degree or equivalent in a related discipline (such as computer science, engineering, or information technology)
- Strong understanding of Web technologies (JavaScript, HTML5, CSS3, and cross-browser compatibility)
- Experience with user-interface and user-experience design
- Experience with jQuery, Backbone.js, or other JS libraries highly desired
- Knowledge of enterprise networking technologies a plus
- Knowledge of software engineering methodologies and effective unit testing

The Opportunity

ExtraHop Networks was founded in early 2007 by engineering veterans from F5 Networks and architects of the BIG-IP v9 product. The company's award-winning ExtraHop Application Delivery Assurance system is the industry's first completely passive network appliance that provides application-level visibility with no agents, configuration, or overhead.

At ExtraHop Networks, we are focused on building a great company that delivers superior technology and solutions for our customers. We are competitive and professional and enjoy both working and playing hard. Our hiring process is rigorous and selective in nature, designed to provide a great opportunity for career advancement as well as to create a tightly knit team built on mutual respect and trust. We promise an environment where you will have an opportunity to shape your career while playing an instrumental role in building the next great systems company.

Physical Demands and Work Environment

Duties are performed in an office environment while sitting at a desk or computer table. Duties require the ability to utilize a computer keyboard, communicate over the telephone, and read printed material. ExtraHop Networks is an Equal Opportunity Employer.
